

**T20/DP178 AND T21/DP107 ARE ACTIVATORS OF HUMAN PHAGOCYTE
FORMYL PEPTIDE RECEPTORS**

ABSTRACT OF THE DISCLOSURE

5 The present invention relates to the discovery that T20/DP178, T21/DP107, and
fragments thereof interact with members of the formyl peptide receptor family and
thereby modulate cell migration and activation. Novel biological tools, prophylactics,
therapeutics and methods of use of the foregoing for modulating an inflammatory
response are disclosed.
